

Data Gaps

Technical Rule	Sub Rule	Additional Rules/Regs/Acts referenced	Rule	Sub Rule	Data Gap
16			The following shall be included in a characterization of a watershed, where the information is available:		
	3			With respect to drinking water systems, (a) the location and area served by a system, (b) the classification of the system into the following classifications as defined by O. Reg. 170/03 (Drinking Water Systems) made under the Safe Drinking Water Act, 2002: (iv) Small municipal non-residential system.	Unable to Map and classify small municipal non- residential systems, due to lack of information.
	6			A comparison of the communities described in clause (5) to similar communities not impacted by anthropogenic factors. (5) The location and types of aquatic habitats, including coldwater, mixed, and warm water fisheries, and macroinvertebrate communities.	No information available in the Cataraqui Source Protection Area.
19			Subject to rule 24, a conceptual water budget shall include an assessment of the following:		
	5			Groundwater aquifers, their direction of flow, and mapping of the water table and potentiometric surface(s).	Cannot be calculated due to lack of accurate information.
	7			Interactions between groundwater and surface water.	Comprehensive mapping of groundwater recharges and discharges does not exist for the Cataraqui Source Protection Area
