- Expressway / Highway
- Collector
- Watercourses
- Waterbodies
- Wetlands

Intrinsic Susceptibility Index

- High Vulnerability (ISI < 30)
- Medium Vulnerability (ISI 30 - 80)

Note: An assessment of groundwater vulnerability was completed for the Lansdowne Wellhead Protection Area using local data and the Intrinsic Susceptibility Index method; this information refines the Cataraqui-wide assessment that is shown on Map 5-1e. The assessment reflects the degree to which contaminants at or near the surface could move into and through the ground towards the well.

Created: March 4, 2010
Printed: February 23, 2011

Scale 1:10,000

Universal Transverse Mercator Projection
North American Datum 83

December 2009
